

Approved Products List for Passover 2010/5770

Food

Baby Milks

If Passover supervised formula cannot be obtained, it is still preferable to use a Kosher one that has been supervised for the year. If supervised formula is not available or in cases where it is not suitable for medical reasons the following may be used. It should be noted that with the exception of soya formulae, these do, of course contain unsupervised milk. Many contain Kitniot. Separate vessels should always be used for their preparation.

Where applicable, listing includes powder and ready to feed versions.

Legend

Frozen Fish

All frozen Kosher species of fish, whole or filleted, are permitted for Passover provided some skin is still attached and no other ingredients have been added. It is advisable to rinse the fish before use.

Frozen Vegetables

No unsupervised frozen vegetables are approved for Passover. This is because many factories use starch or citric acid in processing, and may use equipment for pasta products.

Glucose Tablets & Gel

- NP Dextro Energy
- P Glucogel
- NP Lucozade Energy

Mineral Water

Badoit
