

This list has been compiled by Rabbi A Adler BPharm MRPharms, a practising pharmacist, in consultation with the food technologists of the London Beth Din.

General points regarding medication for Passover:

- In general all solid dose tablets and capsules are in order for Passover use. Wherever possible, tablets or capsules should be used rather than liquid preparations. Flavouring may contain wheat-derived ingredients.
- Many liquid and chewable preparations contain ingredients such as sorbitol and glucose, which may be wheat derived. This includes sugar free antibiotic liquids
- Inedible creams, ointments and inhalers are all permissible. Avoid those which advertise Chametz ingredients on the packaging (eg Aveeno cream, based on oats).
- **Do not alter any prescribed medication without consulting a doctor.**

| Legend | |
|-------------|------------------------------------|
| D | Dairy & Suitable for Passover |
| P | Parev & Suitable for Passover |
| NP | Not suitable for Passover |
| NK | Not Kosher all year round |
| S | Supervised for Passover |
| KLBD | Certified for Passover by the LBD. |

LIQUID FEEDS & DIETARY PRODUCTS

(For seriously ill patients)

The products listed here as suitable for Passover are free from actual Chametz, though in most cases contain kitniot. It is important to use separate vessels for preparing and serving these items on Passover.

Please note that the strawberry, blackcurrant and raspberry flavours of these products sometimes contain E120, which is Not Kosher. If they do, alternative flavours should be used.

ANTIBIOTICS

All antibiotics in tablet and capsule form are permitted. Sugar free varieties of liquid antibiotics should be avoided. If a doctor prescribes an antibiotic liquid for a child, try to obtain one sweetened with sucrose rather than sorbitol. You can ask your pharmacist for advice.
