

## Medicines for Passover 2011/5771

***This list has been compiled by Rabbi A Adler BPharm MRPharms, a practising pharmacist, in consultation with the food technologists of the London Beth Din.***

General points regarding medication for Passover:

- In general all solid dose tablets and prescribed capsules are in order for Passover use. Wherever possible, tablets or capsules should be used rather than liquid preparations as the flavouring may contain wheat-derived ingredients. It is preferable to use regular tablets rather than gelatine capsules when taking non essential medicines.
- Many liquid and chewable preparations contain ingredients such as sorbitol and glucose, which may be wheat derived.
- Inedible creams, ointments and inhalers are all permissible. Those which advertise chametz ingredients on the packaging (eg Aveeno cream, based on oats) should be avoided.
- **Medication should not be altered without consulting a doctor.**

### HOMEOPATHIC PREPARATIONS

*Due to the large number of homeopathic preparations on the market it is impossible to list individual items. If you are receiving a homeopathic treatment from a practitioner you should ask you*

practitioner to ascertain the source of your remedies.

Solid homeopathic products can be formulated either with lactose or with sugars e.g. sucrose. Those formulated with lactose should be treated as Dairy and should not be used together with or after meat.

Liquid homeopathic products are often formulated with ethyl alcohol. This is usually derived from sugar or synthetic and does not present a problem.

The following have been checked:

- P** Don Harrison Liquid
- NP** Helios Liquid
